Subject: Columbia Ready-Mix Rule Applicability Determination

This is a brief status report on Columbia Ready-Mix. This is source Bonnie and Regina discussed on 6/14 and Bonnie indicated she would pursue having Betty or Doug's Unit pick up lead on.

This source was sent a notice in April 1999 that it is potentially subject to P71 rules. The source was reminded that it needed to reply to EPA in Jan 2000. The source replied, stating they did not believe they are on-reservation. The Yakama Tribe believes the area is part of the reservation. To help with determining, both whether source is on-res'n and whether P71 applies, Regina drafted a section 114 letter with help from Elizabeth Waddell, John Keenan and Rich McAllister.

To date, the source has only partially replied to the section 114, although it was due June 5. OAQ follow-up needs include review of 114 response to assess what has been answered and what has not, then contacting source to get needed info. Possibly a meeting with source would be best way to get info. Need to apprise (invite???) both Tribe and YRCAA of any mtg - note OAQ controlled correspondence from YRCAA on this source (Regina preparing reply).

Regina would likely still be involved, coordinating with Rich M the contact with BIA to map source. Regina will be happy to brief pick-up staff person to ensure smooth flow of workstream.
